Objective

To obtain a position as a front end web developer.

Background

I have a background in applied art and graphic design along with a high attention to detail. I now wish to apply my talents towards developing intuitive websites. I wish to collaborate with professionals solving real world problems in order to gain valuable skill-based experience necessary to grow in the field.

Skills

HTML	CSS
JavaScript	jQuery
Adobe Photoshop	Adobe Illustrator
Illustration	Graphic Design
Photography	Marketing

Education

Grand Canyon University
M.Ed. Special Education
May 2008

San Diego State University
B.A. Graphic Design
May 2002

Coursework

Code School Front End Formations	Codecademy HTML & CSS
Treehouse JavaScript	W3 Schools jQuery

Industry Experience

Flapjack Labs
March 2016 – Present
Contract Web Developer

I work with clients managing content, evaluating design, and general maintenance for company websites. I collaborate regularly with the graphics department and evaluate rough designs prior to client presentation. I also serve as the liaison for clients in regards to questions and concerns.

Non-Industry Experience

Clayton County Public Schools
December 2003 – September 2016
Special Education Teacher

I was responsible for the creation and implementation of individualized educational instruction plans that focused on academic remediation with integrated behavior intervention strategies. I personally developed departmental and school-wide data collection systems to monitor student performance. I also provided ongoing support to staff.
